EXPERIENCE/ABOUT

Experience in learning and performing dialogue heavy scripts on feature and short film productions, playing a range of lead and supporting roles; full working weeks as a lead Actor; dealing with continuity and character development in a non-linear shooting schedule. Lead roles for Digital Film Production and Cinematography student projects at Ravensbourne University, with a full crew and professional setup. Doubling on high-budget feature film for lead cast (Taron Egerton).

Choreographed and performed swordfights, martial arts sequences and more generic fight/brawl scenes.

Worked on many large-scale productions as a Supporting/Featured Artist, which provided me with insight into the process of high-level professional film making.

Emotional/intense scenes to include death (being stabbed, having throat cut), murder (stabbing), panic attacks and hallucinations/mania.

I enjoy creating a wide range of character types, from psychopath to nerd, emotionally vulnerable to martial artist, detective to hostage. I am currently exploring myself as a performing artist and allowing my imagination to run wild; to my delight, in doing this I feel alive.
